

THE SCHOOL/ COLLEGE MANAGEMENT INFORMATION SYSTEM (MIS)

A complete web-based school management system for schools and colleges.

Proven School MIS

We collaborated with over 1000 education professionals, teachers and administration staff to deliver this effective and efficient school management system with an end goal of enabling you to simplify and automate daily School administration tasks; from student registrations & approvals, course & units registration, accounts & fees statements, vote heads registrations, etc all by **#JustByAClick**

System Features

This software is designed to suit all education institutions and provides Comprehensive and Enriched school management functions and reports in real-time.

Whether small, medium or big school, this information management system is built and can further be customized to serve your exact needs.

Organize Your School
Activities with the in-built
School Calendar Module

KEY Factors

When developing this software, we did put **FOUR** key factors into consideration - which make it better than the reest in terms of performance & usage.

Web Based

This system is accessible through the internet so you can access reports anywhere and on the go. Can also be installed on premise

User Interface (UI)

This system's UI is well thought through looks attractive and simple to use even to non-techies. It's easy to locate reports, settings & other features with very few clicks

Scalability & Extensibility

This system is futuristic - it's developed with the latest standard programming languages & databases. Thus, is able to be integrated with other systems/software your organization has or will have in the future.

Security & Data Backups

The system has automatic Data Backup functionality and it uses data & code encryption during transmission and storage of data. This basically means, attackers cannot understand or successfully tamper with code and data without knowing the encryption key.

100% Paperless Library

The system comes with a powerful Library Module which is a complete solution for managing and administering any size of Library. Our Research and development always keen to make the software most fast for the operations of the librarian.

The Software is fully featured with Barcode, shelf management, automatic billing to late returns of books and more.

DISCOVER OTHER BEST FEATURES OF OUR MIS

Admission Management

This system eases administrative functions such as; School Finances and accounting. Student admission & placement, Comprehensive Grading system. Role assignments. Staff management. School Calendar of Events. Automated Timetabling. Budget and Control.

Student Management

This system is designed to enable you have all your students information at your fingertips; track, maintain and manage all the data i.e students' grades, attendance, their interpersonal activities records, etc.
